### Disclaimer

Information shown on screens for this tutorial was taken from test data developed for the hazardous waste reporting program. Device, process, and other information from existing facilities were used for illustrative purposes only. Existing facility data was used to show typical usage of screens in the program. None of the information presented in the following screens should be viewed as accurate information.

## **Hazardous Waste Form WR**

Hazardous Waste Form WR, Waste Received from Off-Site, is generally completed by Treatment, Storage, and Disposal Facilities. Form WR collects information about the quantities and characteristics of each hazardous waste received from an off-site source.

Form WR has an initial screen which is a tabular format, listing all waste codes entered. To enter a new waste code, click on the 'Add' button. To modify existing information, select the row to modify by clicking the mouse on the appropriate row of data or use the up and down arrows on the keyboard to move to the row that you want to change. This will highlight the row.
